

Michael Arman MPIA

Research Planner

2010

Michael has a flair for research and analysis, established through his experience in both industry and academic environments. He is particularly skilled in demographic analysis and interpreting many layers of statistical data in a way that highlights the implications for planning. His research skills have been refined working at the University of South Australia as the lead researcher in a project linking affordable housing with environmental sustainability. This research experience has enhanced his ability to critically analyse, reflected in his several academic publications. Michael also has a keen interest in natural resource management and social planning.
